Osobine proizvoda

The perforated SB3 pallet box is ideally suited for handling fresh produce. From harvesting to processing of sensitive fruit and vegetables: this one-piece injection moulded pallet box offers perforated walls and base for good ventilation that ensures reliable product quality. The perforated SB3 pallet box is optionally available with three runners or nine feet and offers an extremely resistant construction with high base stability as well as additional ribs on the sides to increase ram protection against forklift tines. The particularly stable runner or foot connection ensures extreme resistance and, with the former version, secure lift-tilt emptying by a rotating forklift. The design with Euro stacking system (all-around stacking shoulder) makes the SB3 pallet box compatible with a number of pallet boxes in the market.

Spoljne dimenzije: 1200 x 1000 x 790mm

Zapremina: 610 L

Masa: 41.5000 Kg
